

# Honeysuckle Room Activities

## In The Sky: Sun and Moon

*Sensory - Put some flour in a tub to create the surface of the moon. Use a cup or empty bottle to make indentations in the flour. You have created craters! Smooth the craters over and start again.*

*Snack - Sunshine Smoothie - In a blender add 1 cup milk , juice of one orange and six ice cubes or more to create the desired thickness. Yummy!!*

*Science- Sun Prints- Have Your child collect several objects that will fit on a piece of construction paper. Use a dark color of construction paper. Have your child set the paper in direct sunlight and arrange objects on the paper. After several hours have your child remove objects and observe what has happened to the paper. Which spots are lighter than others? Why?*

### *Motor Skills-*

*Fine Motor: Make Paper Bag Ball*

*Take a paper bag and fill the bag with crumbled paper like newspaper, tissue paper or a smaller crumbled bag. Fold the outside bag shut and crush it a little to make a round shape. Tape it shut.*

*Gross Motor: Play with your Paper Bag Ball*

*Toss it in the air. How high can you toss it? Did it reach the sky? Play catch with someone in your family.*

### *Art - Paper Plate Sun or Moon*

*Moon- have Mom or Dad help you cut a quarter or crescent shaped moon out of a paper plate. You can color it and then draw a face. You created the “man in the moon”*

*Sun - Color paper plate with yellow crayon or marker. Fringe the edges of the plate to make the sun’s rays. Add a face by gluing objects on the center area of the plate. You can use whatever you find around your house like: buttons, construction paper, fabric, felt, tissue paper. Have fun!*

*We hope you enjoy doing these activities!*
